LIVE HEP FREE

Hepatitis
NSW

They have contracted hepatitis C, a viral illness that affects the liver and they now have easy access to revolutionary, first-class, cures for their hep C.

If you have hep C...

Get informed:

Hep C is now an easily cured infection. Treatment now gives more than a 95% chance of cure and has very few side effects.

Get a check up:

Re-engage with the medical system. Make an appointment with a doctor or nurse and ask for a hep C treatment assessment.

Get treated:

Across Australia it has never been easier to access treatment for hep C. Here in NSW, hundreds of doctors are now treating hep C - in addition to hospital liver clinics and other health care clinics.

Visit our online directory or phone the *Hepatitis Infoline* to check the location of your nearest hep C treating doctors or clinics. The *Infoline* can also tell you which nearby chemists will fill your scripts.
